

Dear Ho-Dat Tran,

You are cordially invited to present your accepted paper

ID: MIWAI-2026-Paper-141

Title: NFTransUNet: A Neuro-Fuzzy Deep Learning Model for Breast Tumor Segmentation in Big Data Environment

in the 19th International Conference on Multi-disciplinary Trends in Artificial Intelligence 2026 (MIWAI 2026) to be held during October 10-12, 2026 in Halifax, Nova Scotia, Canada.

The presentation dates for the accepted papers, both on-site and on-line, will be during October 10-12, 2026. In addition, there are also workshops and tutorials, which will be announced later on. On-site registration begins from October 10, 2026. Detailed program will be available shortly on the website.

MIWAI started its journey in 2007 and has been incorporated with LNAI since 2011. Throughout its journey, MIWAI has been focusing on high quality research in AI. MIWAI 2026 welcomed aboard a large band of nearly 150 program committees (PC) from 30 countries. There were more than 450 authors, from 45 countries. Viet Nam has the highest number of submissions (55), followed by India (43) and Canada (19). However, Viet Nam has the highest accepted papers (39), followed by Canada(6), US (5), South Africa (5) and India (5). The review process has been carefully and deliberately conducted to ensure only high-quality papers are accepted to MIWAI 2026. All papers received at least double-blind reviews. While most papers received 3 reviews, some papers received 5 reviews. In addition, there have been several rounds of suggestions, discussions and improvement attempts with regards to the quality of each paper between authors and MIWAI 2026 General and Program Co-Chairs in order to maintain high quality standards of the conference before making decisions. The number of submitted papers was 200 and only 76 of them were accepted to be published in the proceedings. This makes the acceptance rate to be 38%. Congratulations!

Looking forward to seeing you soon.

Best regards,

Chattrakul Sombattheera

MIWAI 2026 General Co-Chair
